PERSONAL BULLETIN No. 4
April 16, 1954

Dear Associate:

The following news is authentic. It is a personal first-hand report from one of our best-known Associates - whose name will be given within a few days. This Associate has spent two days at the Edwards Air Force Base (So. Calif.).

At this Base five types of aeroforms are under top-level inspection, with the permission and help of the Etherians. The process of mat and demat have been demonstrated. There is consternation, confusion and collapse among scientists, technicians, and governmental authorities. It is believed by our Associate that President Eisenhower will take supreme control of the situation if present impasse continues of bitter conflict among our own department heads. The President visited the Base during his Palm Springs vacation and is believed to be fully informed of all developments. Our Associate visited this Base in company with three well-known persons. He believes that the President will make a public statement about the middle of May.

If a period of public confusion follows on this, it is possible (and probable) that subversive and communistic elements will make as much trouble as they can - as this will be a golden opportunity. We are already being told that "Communism would be better than the destruction of civilization." We urge BSR Associates to cooperate with all legitimate authority, for public welfare.

The situation at the A.F. Base is already known to the major news services, and in any event cannot be kept secret much longer - and stories by hearsay are certain to be distorted. We do not feel that any principle of security is being violated by this present release. We hope no one will sensationalize what has been said here (the more facts in themselves being the most remarkable news story in recorded history).

Your BSR Director has had an interview of about an hour with the Controls Ramon Natalli and the Yada di Shi'ite, relative to the news here summarized. A transcript of this is being prepared (mimeo from tape recording). We shall have to charge for this - mimeo of that length is too expensive for free distribution. If you want a copy send us (say) $1.00 - or less or more. This transcript is a note of sanity and wisdom in a very jittery world - and highly informative as well.

In this connection we point out (since it's all in the family, so to speak, and no axe to grind) that all basic information concerning the aeroforms, given us by the MP Controls in 1946, has been and is now being verified - their origin and purpose, their etheric nature, their operation by etheric or space people, much of the super-physics involved and which now is so devastating to the textbook science of the experts assembled at the EAF Base. The tide has been turning in our favor for some time - and it now reaches its flood stage in a great historical event. Quite seriously, the destiny of our race and planet hangs in delicate balance - but the issue is in our own hands and Mankind can and will win through into a better world.....M.Layne.

FLYING SAUCER LANDING AT EDWARDS AIR FORCE BASE

MUROC DRY LAKE, CALIFORNIA

The following recording was made April 17, 1954, at San Diego, California. Seven persons present, Mark Probert, medium. The first part of the recording relates to a report received on this date dealing with the landing of Flying Saucers at a California airbase and their inspection by our own scientists and by high governmental authorities.

"I am Ramon Natalli," said the Control.

"Good afternoon, Ramon."

"We are sitting in on a highly critical subject," said Natalli. "My friends, in the passing years that we have had the honor and pleasure of speaking to you it is, I think if looked back upon, quite plain what we were trying to say. That is, your civilization is at a very dangerous point, bordering on the razor's edge of annihilation.

"My friends, you have undoubtedly been keenly aware that we have been holding back much of what we could have said because it is and has been our policy not to sow seeds of fear, because unless we could see your civilization doing something active about the coming debacle it would be cruel instead of reasonable and kindly to tell what we have learned; the whole story. Now, we do not say your civilization is necessarily even now going into destruction. There is yet time to bring about a peaceful and intelligent way of life. All changes taking place in individual things or things en masse tends toward some chaotic conditions, but this does not mean that it must all end in chaos. However, man, in his blindness, has been charging madly ahead with no thought of where his actions are going to take him. You have become proud of your mechanized age and have lost track of your own divinity.

"There is a great responsibility lying on the shoulders of every individual coming into the physical world. That responsibility is to keep as much of his own environment in balance so that the world can continue to exist as the necessary school in which he will come to know consciously of this aforementioned Higher Self or dicinity. The people have been lulled to sleep by those wishing for greater power. Religion, having control over politics and over scientific action, has been the sleeping potion put upon the people. You, here in this country have been given, in the beginning of the founding of this country, what is called the Bill of Rights, but you have been lulled to sleep, and the right to act individually has been destroyed, I am no moralist. I am speaking about nations at large. It is not a matter of material moralistic viewpoints. It all entails a greater scheme by far than are morals or ethics. It entails the continued existence not only of your earth but of your entire solar system.

"In the past," said Natalli, "we have come towards minimizing the actions of atomic power as a deadly threat against your solar system. Now this must stop. We must break clean and true. The truth is that man, starting in 1945, took into his conscious hands the use of a force so devastating in its potential powers as to turn your earth into a nova and thereby affect the entire solar system. Little by little your scientific minds have delved deeper and deeper into the building blocks called matter, called energy, but few have publicly mentioned that within the atom are forces as yet untouched and unknown to the greater majority of the scientific minds, force that if unleashed would turn your whole solar system into a nova. All the bodies in your solar system would explode and end in loose matter floating through space, almost dead matter, for when it finally ceased its actions, it would be on a very, very low level. Within the nucleus of an atom are forces up into the hundreds of thousands of millions of pounds of pressure per square inch."

"Hundreds of thousands of millions of pounds?" asked Irene P.

"These have not been touched yet. These, my friends, as we have mentioned before, in the use of the atomic bomb there is only one tenth of one percent forces disrupted in the atom."

"One tenth of one percent of the total forces resident within the atom?"

"Yes. Now, in the hydrogen fusion action the forces are many thousands of times greater. Believe me, the end of the actions of the hydrogen explosions by your country, England, and Russia, is nowhere near in sight. Many strange things are yet to follow due to this. Gravity, it is said, has no action in the nucleus of an atom, that it is all electronic forces within. No, as small and seemingly insignificant and quite invisible as the nucleus of an atom is, it does feel the effects of gravity, for it creates a surface and it is when this surface or part of it is disrupted that the gravitational force is torn away from it. Being invisible does not mean intangibility and a small body containing within it such tremendous bundles of force, creates a surface that is equal to a great sun and takes that much gravitational pressure to hold its parts in place. So what with the tearing away of the gravity field against the atom and letting loose these tremendous pressures, you would shatter your earth. Now your world of science is going to play with not simply atoms as you believe you have known them in the past, but with subatomic particles and the deeper you go into the nucleus the finer, the more dense, therefore the greater forces pent up in each layer. Now I'm certain you know nothing about what is called the inner parts of the nucleus of an atom, huh? These forces are largely yet unknown by your scientists and the great Einstein will have to change some of his ideas with respect to relativity in the course of time. It is in these deeper layers or more intense waves of what is loosely called energy but yet it is substance that cannot even be classified as energy. It is in those fields that these great things have their existence."

"You are referring now to the Etherians?" asked I.P.

"Yes. Man will learn how to move in and out of various frequencies," said Natalli, "but that is a long way ahead on the path of his mental evolvement. The Etherian people do not care who is right or who is wrong, they are coldly disinterested in isms. They are simply trying to keep man from disrupting the entire solar system, and they are going to do it if they have to destroy the whole human race from earth and transplant other beings from other planets who have been seeking to get here anyway. This is not a threat. This is not because they are concerned with any moral aspects. This is simply a direct statement of fact with no emotions behind it. Now you want to say something to me?"

"Have you been present at Muroc lately?" asked Meade Layne.

"We have been there many times and have known what was going on there. Several months ago there were certain things we had to say to you but conditions could not be arranged so we could get together, however it was better so, and I am of the opinion and I know all of us of the Inner Circle are of the same opinion that it would be wiser not to put any of this out to the public."

"That includes what is in Dr. Light's letter?"

"That is what I am saying."

"I believe Dr. Light is intending to publish in some form a statement . Not all of it was in that letter which I read which perhaps you heard, but there are some portions of it at any rate."

"Well then, I would suggest that you and he arrive at what you think is possible to certain individuals and that will be enough."

"Of course it's quite plain that what has taken place at Muroc will leak out."

"It is better, sir, that it leaks out through somebody else than you."

"What leaks out is almost certain to be distorted and misunderstood. That also is to be reckoned with."

"This is correct, I agree, but if you do give out this thing, these writings of good Dr. Light, it would be better that you send them only to a very chosen few."

"That was my intention. If we printed anything at all after consultation with Dr. Light, we would send it only to members of our group; to our Associates and particularly to those whom we consider responsible."

"And I am suggesting that one of these ve the man Desmond Leslie."

"Do you feel, Ramon, that Eisenhower is sincere in his attempts at what he might try to do? Is pressure being put on him, or what?"

"This man like all men of his kind in high government positions is the leader or is a symbol of such in your country. They are always under pressure. They cannot act alone. Back of him in the shadows stand such individuals as Bernard Baruch and next the High Roman Catholic Church. These are the two main forces. Next in line are the powerful dictators of Communism. Now if you will remember a quote in the "Magic Bag," "Now it starts from words to blows."

"Yes, I recall that."

"And it shall not stop," said Natalli, "until all of these insane forces are either destroyed or made so weak they can no longer function to any dangerous extent."

"You heard Dr. Laine mention in Dr. Light's letter in reference to Communism and it taking over, be bound to it, the excerpt from an article in Time magazine. What is your opinion there?"

"There will be no such a thing. Under no circumstances will this take place. It will be Russia that must go down, and I do not mean the Russian people. I mean the Communistic regime. This is a deadly force to the individual's existence, but so is Catholicism."

"I think you made reference in the 'Magic Bag' also that the two would fight one another until they would weaken each other."

"Until death, or one or the other are dust. My friends, these two factions cannot survive together on the planet and have peace. Now the Etherian peoples have come and have been in close contact with the various governments of the more important, or by that I mean larger countries. Peace must come. China will be in time recognized, the communistic government there, but the Etherians, not being interested in isms will arrange it so they will live under their own beliefs as each nation must, but think little about them as ruling the world. No nation can rule the world and no one man can rule another."

"Do you see anything pertaining to the excerpt in the letter also regarding dividing our country into north, East, South, and West?"

"No, this cannot be done. This must not be done. There are too many barriers right now. All the existing barriers must come down; the iron curtains and the feather curtains. You have a feather curtain of democracy and sometimes this curtain gets like iron, too."

"Do you foresee an armed struggle in this country between communism and established forces?"

"No, I do not."

"Do you foresee our being drawn into the Indo-Chinese conflict; armed intervention?"

"No, not armed intervention. This I do not see. I see great supplies and occasional individuals, advisers, and those who are adventurers joining in," said Natalli, "but as for your country sending troops and such, no, not unless China and Russia join forces."

"That is not too likely though, is it?"

"No, it is not because the Chinese Communism is not on the same level as Russian Communism and whether the Western world makes these facts known or not is of little difference. Before the Czars and priests of the Russian churches were thrown out, the Russian people lived in total slavery. Communism as a government has brought great relief to the masses though it has also meant a great deal of p pressure to the individual's way of growth. Remember, the Russian people, being almost entirely illiterate in those past times, now are largely educated, at least academically so. The modes of action of the individual are greatly impeded but his economic way of life is far superior to what it was while under the iron rule of Czarism and the Russian orthodox church."

"Ramon Natalli, do you see the members of the Masonic Lodge becoming aware of the fact that they should become more true Masons and less interested in the material gains they get out of becoming a Mason?"

"Not unless the heads in the different parts of the country do something actively to awaken members and to let go those who refuse to make a concentrated effort to know Masonry and what it really entails."

"Yada, especially, within the last few weeks has mentioned several times the renewed activity of Catholicism trying to disrupt Masonry, and I thought perhaps there might be something of importance you wanted to mention in that respect."

"Only that they are starting this concentrated drive because they think of the Masons as they do of the Communists. They are the only two great forces that threaten the existence of Catholicism, but at the present the Masonic threat is very weak. It had better start strengthening itself."

"Is President Eisenhower, at the moment, planning to release information about the arrival of the Etherians in the coming months?"

"He is, but in doing so, providing pressure is not put upon him, he will have to be very careful how he words his thoughts, otherwise you will have wide-spread panic."

"I just wanted to ask if his so-called rulers would allow him to express himself as freely as he thought advisable?"

"This will be up to him, I do not know."

"You mentioned Bernard Baruch as being his closest pressure," asked FO. "It is my understanding though that he is very much associated with the ruling factors of Russia, and if he is that close to them, that is pretty close to us."

"Your president has been trying to carry on with the former president Roosevelt's policy of keeping peace as much as possible, but he is caught between Catholicism and the Russian Communistic regime. I think, however, that the Russian government, as we have said in the past, has no desire to start an open war. We have said before that though she may make advances and seem to offer great immediate danger when she is threatened, she will back down. Her policy has been and shall be to undermine all nations of the world and take them in one piece. She will instigate other countries into wars but she herself will not enter in."

"Is it your opinion that our governmental authorities and also the great ones in the world of science will conform to ideas and restrictions suggested or urged on them, or commanded by the Etherians?

"Yes, they will," said Natalli.

"So that research on the high explosives will at least have some limit put upon them?"

"Yes, I do, but in order to do this, Catholicism will have to be taken into hand. It will have to cease as a threatening faction against Communism."

"I don't understand, Natalli, what will have to cease?"

"Catholicism," said Natalli, "will have to cease as a constant threatening faction against Communism before any real lasting peace can be made. Catholicism acts as a constant irritant and will not let the political leaders bring peace."

"Do you think there is any power able to enforce that upon the Catholic hierarchy without extreme violence."

"It is in the scheme of things that certain measures will be taken by the Etherians to disseminate the ideas of Catholicism being the only Godly force on earth and then destroy the teachings."

"In using the word disseminate, you mean nullifying or scattering the Catholic digma?"

"Yes."

"Is there any connection with all of this letting of the Hawaiian Islands become a state or not become a state? Is there any connection at all with that?"

"Of course," said Natalli. "The spreading out in territory of any nation is always painful and acts as a threat to another nation, for the more one nation gets more countries to spread out in, the smaller grows every other nation.

"It is what happened to England," continued Natalli, "when she started her empire building. Every nation went down before her. She became the ruling faction of the earth to a great extent. She is now reaping the rewards of her iron-fisted way."

"Before you go, Natalli, I would like to return to trivia about the mesons and their effect on glass. Is that all right, can you speak of that? As I understand it the fractures are due to meson impact and I just don't understand why they occur almost entirely on the windscreens, on the front of cars and not on the side windows, not on windows in houses, not on eye glasses and other glass construction."

"It will take place in the course of time."

"In the near future?"

"Yes."

"Now can there be anything so selective as that? If they are meson rays I should imagine they would come from all directions."

"It is not meson rays that are doing them by impact. It is by causing chemical changes to take place in certain points in the atmosphere, affecting the chemistry of the atmosphere that produces substance that causes the breakdown of the particles that hold the glass together."

"Why only on some glass and not on others, and in certain positions and not in other positions?"

"This, at the moment, I cannot say."

"It is said they seem like little pieces of soot, sort of like what we call coal soot, or whatever you want to call it, that drops on the windshields."

"This forms a chemical substance that when touching this glass causes several intense units of heat to be let go, penetrating the glass, and instead of dissolving it, powdering it."

"Do you identify the mesons with cosmic rays?"

"Yes. Now, my friends, this is part of the action of chemical changes taking place in your atmosphere due to cosmic radiation and hydrogen radiation and other atomic particles mingling in the atmosphere."

"Do you differentiate between hydrogen radiation as you just mentioned it and mesons?"

"No."

"Hydrogen is the origin of it?" asked someone.

"Yes, but it is all in the cosmic radiation, you have the forces coming directly to the earth at great speeds and penetrating through to the earth and letting loose this substance, hydrogen, into the atmosphere. You do not have it moving in that direction but is scattering in the atmosphere in a more condensed form. Am I understood?"

"Well, I'm not sure I understand it completely."

"This graphite-like substance that has been found as a small residue on the glass is sometimes magnetic and sometimes not."

"This is to be expected for it is metallic substance and charged with a positive force. This reason for some of them being and others not it is only because this positive charge is of a very short duration and is lost."

"That sounds reasonable."

"Is there a powerful heat effect when the glass punctures?"

"Yes, but it is not heat as in the way -- let me put it perhaps this way. What is the temperature to break down carbon artificially?"

"You mean to burn it?"

"Yes."

"Several thousand degrees."

"Yet the body burns it at 98.6 degrees, huh? How is this? It is because it burns it at very minute quantities. It is letting loose energy in minute quantities but having intense force within. If these particles land on you, your body, they will cause for a moment some sensation."

"Is there any harm done to humans at all by this phenomenon, so far?"

"No."

"Is there any danger?"

.. "No, because the charge is of too short a duration."

"Dr. Layne, you made a statement there in the kitchen of someone who had made a prediction a while ago that we would have quite a few, what was that again, phenomena taking place."

"Criswell." Said Natalli.

"He predicts," said Meade Layne, "and even dated some seven catastrophes of considerable magnitude in the coming twelve months. Also one near at hand of great magnitude."

"If you do not mind," said Natalli, "I will go. My friends, again I suggest you life today, you live now. You have a song written. This song goes, 'There is no tomorrow,' You remember it?"

"There is no tomorrow, there is just today." said I.P.

"Live today. I don't mean to resort to debauchery, I mean simply live and enjoy while you may."

"I hope I didn't give the idea that we were primarily interested in Mr. Criswell. That's incidental."

"Yes. I bid you good afternoon."

THE CONTROLS CHANGED --- RAMON NATALLI WAS REPLACED BY YADA DI SHI'ITE.

"Sina, Sina-ha, I am Yada Di Shi'Ite."

"Good afternoon, Yada," said the group.

"Have you been listening to us?" said F.O.

"Could I help it?" said Yada. "It sounds like there is an air of pessimism and I am not at all certain you are wrong, but nevertheless it is not going to improve your daily living to hold onto that attitude. When danger threatens all one can sensibly do is to face it and see what it is consisting of, for no danger, no threat that nature itself has made against the life forces has ever been so strong, so overpowering as to prevent man from finding some way of carrying on in the face of it. Though man has been completely destroyed from the face of the earth several times in the history of the earth's existence, he has always returned with a stronger and all around better body for resisting similar dangers in later times. Man is largely concerned with the loss of his body. Naturally everything that threatens it or tries to oppose its actions is something fatal to him.

"We of the Inner Circle and I do not think the Etheric people have any certain sure positive antidote to save man from his destiny, no matter what its nature may be. To take a course of action to thwart what we as individuals, as well as en masse, have earned by our action is to thwart the growth of the human mind. If that is inevitable it must be a part of the necessary growth of the human being, for the word death simply means change, the law of change. If those of us who realize this will keep our emotional selves in check, we shall be the ones to survive and to aid a few others to survive; survive any danger that threatens. But the world

"of man has been taught fear," continued YADA, "therefore it is not something that is easily broken. You are not to be concerned with the masses except to the extent that you may see possibilities of helping those around you.

"You cannot stop what is going to happen to another, even so, if it is necessary to happen to that one. I do not paint a tragic picture for the earth. I see man settling down to many thousands of years of peace till he finishes a very necessary part of his education on the earth, then the earth will not be destroyed but the changes that take place will bring about an entirely new race of beings. Some of these will be products of those that are transplanted from other planets. Man himself came from other planets. He is not ' of this earth in his origin. Those that have been seen in the past, ancient times, some of these of a very seeming low form were products of other planets.

"But how did they get here. They came as spores brought out of masses of substance from interstellar space, and finding conditions right started their evolvement on the earth. Your Christian Bible is making a hint at this when the teacher, the Christ, is supposed to be saying, 'In my father's house are many mansions, I go to prepare a place for you in the event of your coming.' Man will reach other planets once he ceases to be so war-like, so savage. This is all in the plan to come. The world of man, this earth, is not going to be destroyed. You will cease to use atomic and hydrogen power, or any of the building blocks of nature as a weapon against your fellow man.

"Will they utilize what they know now pertaining to those powers for growth, and for constructive uses?" asked I. P.

"Certainly, yes. Yet there is a great strain between Communism and the democracies but this is because the political factions that exist do not want the Russian way of life to be at all associated with those of the democratic way because this will lead to free thinking, and free thinking becomes a danger to those of you who rule you. We of the Inner Circle have no feelings about isma, Communism, Democracy, Socialism, Fascism, they're all isms, and they're not worth a damn. There is only one, and only one, that is worthwhile for man's growth and that is the ism of understanding, of love, which gives the whole human race a chance to grow. Christianity has never been given to the people. As it is, it has caused more war, more bloodshed than anything else we know of. If it were not for Catholicism, Communism and the democracies could get together and live in peace."

"True communism and true democracy could, couldn' they?" asked Irene Probert. "They are one and the same practically."

"As it is, you have in Russia a form of iron-fisted dictatorship of a few and over here you have a similar condition only it has not been so widespread. The squeeze of the fist, the iron fist under the velvet glove, has not yet been put on as it is in Russia, but if you, the people do not act and act consciously on your rights, you will become like Russia, owned by the ruling factions. Our statement

"that Catholicism was a deadly thing to the human being has been more or less made light of by many of you. I repeat again, it is the greatest danger to the human being and the earth, worse than Communism because it has a grip on man's mind and soul and spirit."

"Put there with fear."

"Yes." Said Yada. "Communism one can get over. It is a mild ailment. But Catholicism and the whole Christian religion as it is and has been for several hundreds and hundreds of years is a very deadly disease, eating like cancer the brain and controlling the mind. There is no escape from it even into the, what you call, death state."

"Pardon me, do I understand you to say that it is practiced in the Etheric as well?"

"It is practiced in the astral planes."

"That is what I meant to say."

"Yes. In tibet, in India, when one is dying, they have talkers to the spirit or the soul of that one leaving the body. These men come and whisper continually in the ear of the one departing, guiding him through the lower planes. Had that one learned while active on the earth, he would not have to have someone create conditions for him as he leaves. More than that, it cannot hold or last, these suggestions cannot hold or last for very long a period of time and then that one is as lost as ever. And the same goes here on your earth in the Western part of the world, and Christianity where it is whispered in his ears by the priest - craft constantly of what he is to expect in the after life, so that when he passes he is still caught up under the dominating suggestions of these individuals. If you as an individual are to be truly free, it is here and now you must learn to be. No one is going to help you. You are the only responsible one. Take authority in your own hands.

"Yada, in reference to current events, do you feel free to tell us anything about what lies ahead in the coming months?"

"Some suggestions have been made that Chiang Kai Shek will invade the mainland of China, but he will not. This man is a great coward. He is the last of the great land barons living under the guise of Christianity. Nehru is trying to keep Western powers from using his country as a battleground. Russia is very thoroughly surrounded by a great Western arsenal. She could not move to strike without bringing on her immediate obliteration. Yet it is like keeping a mad dog in a kennel. You have to keep constant vigil upon it. The Catholic powers will try to force manpower and ammunitions to be sent to this country and other countries to fight in Indo-China. They may succeed. If this takes place, Russia will try to come out of her kennel and so join with China. It is said by the great Nostradamus, 'The Red hordes shall come down from the north.' You know of that,huh?"

"Yes."

"This you must watch for," said Yada, "the possibilities are now very strong."

"He also predicted though that the Chinese would be in the streets of Moscow."

"The Chinese people are seeking a better way of life. They do not need more land, they need greater education, and how to use that which they have. The Chinese people as people do not want war, but they are driven into it by the leaders of their country, these who are trying to destroy the land barons. My friends, when we reach over here to destroy one enemy, there is always another at our backs. This is always the way of life individually and nationally, for life is better through the laws of opposition. No one can create a Utopia of the kind in which there is not struggle. So you can constantly expect it. Again I go to your Christian Bible and quote, 'There shall be wars and rumors of wars as long as the earth endureth.' Is this not so? But you can, you the world, can have a minimum of peace if,if."

"Such a two-letter word, but it has a big meaning."

"Yada, one question."

"Please."

"We read much of the Arab trouble with the Jews, and of course our papers over here are not allowed to give us the Arab side of it, only the Jewish side because of the power, money and advertising, such as you know. What is the actual condition over there as far as the troubles are concerned?"

"Very bad, because the Jewish people want to spread out and possess as much land as is possible. They want full control. They feel strong now because they do have a foothold in the Holy Land, so-called. It was predicted in your Christian Bible that they would return to the Holy Land, huh? Times have changed reason and purposes. Each race of people desires to dominate other races of people. The Jewish people and the Arabs have been enemies since time that I can remember. When they came down out of the Himalaya mountains, the Jewish people, or the black people, the crimes they committed everywhere they went were of an atrocious nature. They attempted to rule by force and enslavement. That is why they were enslaved when they attempted to attack and enslave the Babylonians. Everywhere they went they have caused terrible suffering, for they have no belief in a Higher Self, though the rulers in the beginning, such men as Moses, tried to bring them this idea. The thought lasted for a period of time and held them under some control, but it is not there any more. They have no belief in survival, therefore they have no reason to do anything to better their condition. There will be much trouble yet between the Jewish people and the Arabs. India must lose a great number of her people if she expects to survive as a nation.

"She can't feed as many as she has, is that right?"

"That is right, nor can the world continue to feed her."

"She only gets bigger." Said F.O.

"This is true also of China," said YADA

"I thought that you had said here quite some time ago though that great numbers of the Chinese and the Indians would be annihilated."

"They still will. This must take place if these nations expect to come back but I do not see them coming back. I see these nations dying, more and more."

"That started a long time ago."

"Thousands of years."

"Does it look like the removal will take place due to natural destruction?" asked RGM.

"Yes."

"You have certainly given us a lot to think about. Of course you have for a long time."

"I am unloading myself. I am selfish."

"We love to be selfish with you and hear it."

"To give is to get less pressure on your back."

"A while ago you were stating that we cause a war over here then they are jumping on our backs. That is the reason we have our eyes in the front, because that is the way that nature balances out."

"But you can keep your other eye, the mind's eye looking in the back, watching from all sides."

"But then we raise ourselves to be that."

"Yes," said YADA.

"We don't need the front eyes."

"Yada, the other night you were talking about electronic light which produces illumination without shadows. Could you talk a little more about that?'

"Now I am not certain as to the method used to bring about this condition but it appears it was a force causing electrons to jump their orbits and I think as you may know when an electron jumps its orbit it sends off various kinds of light or what you may call photons."

"That's right," said RGM.

"Now," said YADA, "if the jump is a great one, a violent one, it may cause ultra-violet radiation. If not, simply a unit of heat or infrared. The jump of these electrons was controlled by an instrument of which I am not familiar so that when it took place it let off simply white light or a combination of the prism in one. Perhaps the man Natalli would know of such instruments and how --------I must go."

"Yada, we appreciate your coming again."

"Thank you."

(YADA withdraws and Mark returns to normal consciousness, but Yada then speaks to Mark clairaudiently)

"They have made a kind of outpost there of," said Mark clair-audiently, "have contacted the various governments and governmment officials there."

"That is in what countries now?" asked Irene Probert

"Argentina and all those down there, but the best results have to be gotten in this country because we are the most educated country in the world. He says all that happens, all the changes that take place in the other nations, the better part of it must work out through this country."

"Yada, do you see the hydrogen bomb being exploded the 22nd of April as previously expected?" asked someone.

"He says he is afraid he does." (A later statement was to the effect that the April 22nd test probably would not take place, as scientists were growing more concerned about the effects)

"Of course you see we're not the only ones who are letting them go." Said F.O.

"Irene was referring to a specific one." Said RGM.

"I'm referring," said Irene, "to the one that Eisenhower made the statement that it would be exploded the 22nd when he was in Palm Springs. Do you still see the danger of the terrific earthquake happening around in Japan and in those islands."

"Yes," said Mark clairaudiently, "He said this bomb is going to weaken conditions very much in the interior of the earth."

"Why in the hell can't they let well enough alone?" asked F.O.

"And he said that is bad because the cosmic radiation that is now pouring to the earth is so much greater than it has ever been before and it's causing a more rapid breakdown by itself in the undercrust ½ of the earth without adding more to it. He says that when one of those things is let off, the vibrations travel for over a thousand feet under

"Yes, that would be right." Said R.G.M.

"Mr. Reynolds brought us an article he clipped from the paper today stating that some of the so-called inactive volcanoes in Alaska are now beginning to smoke."

"He said," replied Mark clairaudiently, "that if you will remember, he told you that would take place some months ago, and he says that there is a strong possibility that the sacred mountain in Japan will blow its top, Fujiyama."

"The dropping of that hydrogen bomb also will increase the activity of earthquakes then, too."

"That's right, and create more storms, more terrible rain-storms than we have ever seen before, the wind, violent winds."
